

Florida's Prescription Drug Monitoring Program

What is the Prescriber DEA Query? It allows health care practitioners to view their prescribing history for a specified timeframe. Perform the following steps to view your prescribing history:

1. Log in to RxSentry at www.hidesigns.com/flpdm.

2. From the **Query Menu** click **Prescriber DEA Query**. You must authenticate the query by indicating that the query is for a valid reason and that you are authorized to submit the query. Without selecting the check box indicating that you understand and agree to the terms and conditions, you will not be able to access the Prescriber DEA Query window. You will be required to accept the terms and conditions each time you start a new session.

3. A window similar to the one on the right is displayed:

User ID(s) : Robyn Weaver Test - robyn.weaver_test

DEA(s) : [input field]

Dispensed Start Date : 12/01/2014
mm/dd/yyyy

Dispensed End Date : 12/01/2014
mm/dd/yyyy

I understand and agree to the terms and conditions of the Florida Prescription Drug Monitoring Program.

4. The **Dispensed Start Date** and **Dispensed End Date** fields are automatically populated with the current date. If you are using the current date to generate your report, you may continue to the next step; or change the **Dispensed Start Date** and **Dispensed End Date** by typing the desired dates or by clicking the calendar icon and selecting a date from the calendar.

5. Click **Submit**. A window similar to the following is displayed.

User ID: [input field] DEA: [input field]		Dispensed Start Date: 01/01/2013 Dispensed End Date: 12/08/2014

You may sort your results by clicking on the column headers that are hyperlinks (**Date Dispensed/Date Prescribed**, **Prescriber**, and **Dispenser**). Click **Generate PDF** to generate a PDF version of your report, or click **Generate CSV** to generate a comma separated value file to display in an Excel spreadsheet or click **Map Results** to view a graphical depiction of your results.

6. Your report will begin to process, and will be available in the **Report Queue** for 14 days.
